Re: 2025-2026 Pricing

Good afternoon Brazoria County

This letter is being written on with the intent to explain the current price increase we requested for the portable toilets we provide. Our goal this year was to increase the pricing for the units that have multi times a week service. With the rising cost in fuel, labor and supplies to perform the services needed we recognized the additional services were discounted to the point it did not cover all the cost associated with the servicing. Each additional service per week cost the same as the initial service and that is how we based the increase.

For any further question please feel free to reach out to me

Thank you,
