

## 21-48 Summary

Approval to renew with price increases for "ITB #21-48 Mosquito Control Chemicals to the following vendors, as per the attached spreadsheets.

- ADAPCO LLC of Sanford, Florida

The 5% increases from manufacturers are due to a rise in costs for raw materials and logistics costs for delivery and disposal.

- ES OPCO USA Inc. dba Vesperis of Austin, Texas

The 2.96%-5.49% increases from manufacturers are due to a rise in the cost for raw materials, packaging and logistics.

Further, in Purchasing's review of the percentage increases submitted by the vendors, it has been determined that the percentages shown on the attached Consumer and Producer Price Indices (CPI & PPI) do not support the percentage increased by the manufacturers. It only supports an increase of 3%

In speaking with Fran Henderson, Mosquito Control Director, due the need for these products to avoid work stoppage on their various spray schedules, its our recommendation that Mosquito Control and Commissioners Court make the determination to approve the price increases to vendors awarded under ITB #21-48.
