Article 6
Compliance Standards

6.01 The Consultant agrees to perform the work hereunder in accordance with County’s road and bridge specifications or Texas Department of Transportation road and bridge specifications, Brazoria County Drainage Criteria Manual and other generally accepted standards applicable

12.02 All expenses associated with mediation shall be shared fifty (50) percent by each party.

12.03 The requirement to seek mediation shall be a condition required before filing an action at law or in equity, unless to do so would prevent either party from seeking relief in a court of law in equity under any applicable statutes of limitation.

Article 13
Termination

13.01 The County may terminate this Agreement at any time by notice in writing to the Consultant. Upon receipt of such notice, the Consultant shall discontinue all services in connection with the performance of this Agreement and shall proceed to promptly cancel all existing orders and contracts insofar as such orders or contracts are chargeable to this Agreement. As soon as practicable after receipt of notice of termination, the Consultant shall submit a statement, showing in detail the services performed under this Agreement to the date of termination. The County shall then pay the Consultant that proportion of the prescribed charges which the services actually performed under this Agreement bear to the total services called for under this Agreement, less such payments on account of the charges as have been previously made. 1.0 Project Understanding

Item	Description
Project Description	Traffic Signal Improvements.
Sitework	<ul style="list-style-type: none">■ Drilled Piers.■ Backfill of Bore Pits

Terracon was provided with the following construction documents for preparation of this proposal:

- Technical Specifications titled Attachment B- TxDOT Spec Items.
- Plans prepared by Pape-Dawson dated 3/6/2024.

A construction schedule was not provided at the time this proposal was prepared. We request the right to review the construction schedule and revise this proposal based on the schedule once it is provided.

2.0 Scope of Services

Our proposed Scope of Services consists of field and laboratory testing. These services are described in the following sections.

Scope Item	Description
Earthwork	<ul style="list-style-type: none">■ Sample backfill material. Prepare and test the samples for Atterberg Limits and percent fines.■ Test soil samples for moisture-density relationship.■ Sample cement-sand backfill for utility trenches.■ Perform density tests of the cement-sand backfill and backfill using the nuclear method to determine the moisture content and percent compaction of the soil materials.

Scope Item	Description
Foundation System	<ul style="list-style-type: none"> ■ Observe the installation of the drilled pier foundations. For each pier observed, information regarding shaft depth, auger diameter, and chained belling tool diameter will be documented. The chained belling tool diameter will be measured when extended above ground for each bell size. ■ Obtain pocket penetrometer readings on soil cuttings removed during excavation at or near the bearing stratum in order to document the approximate shear strength of the soil. ■ The reinforcing steel will be observed, and the concrete cover, quantity, size, and length of the steel will be recorded. ■ Perform compressive tests of concrete test cylinders cast in the field.
Project Management and Administration	<ul style="list-style-type: none"> ■ Attend preconstruction or preinstallation meetings. ■ Coordinate field and laboratory testing. ■ Communicate with Terracon Engineering Technicians, Contractor, and Owner's site representative. ■ Review laboratory and field test reports. ■ Monitor our budget.

2.1 Scheduling Retests

It is the responsibility of your representative to schedule retests in a like manner to scheduling our original services. Terracon shall not be held responsible for retests not performed as a result of a failure to schedule our services or any subsequent damage caused as a result of a lack of retesting.

2.2 Additional Services

If you would like us to perform additional work, please contact us and we will issue a short Supplement to Agreement form, or Supplemental Proposal, that outlines the additional

work to be performed and associated fees. To authorize us to begin work, you simply return a signed copy of the Supplemental agreement.

2.3 Mechanically Stabilized Earth (MSE) Walls

This proposal excludes materials testing and observations related to mechanically stabilized earth (MSE) walls. Should the owner or client require Terracon to provide services on any portion of the MSE wall, Terracon should be requested to provide a separate proposal prior to start of construction of the MSE walls. Terracon requires an internal cursory review of the MSE wall design. This cursory review is only for internal Terracon purposes and is intended to establish the appropriate scope of construction materials testing services for the project if it is decided we will accept the assignment. This review should not be construed as accepting any design responsibility or providing any review capacity for the contractor or owner.

3.0 Schedule

Terracon's services will be performed on an as-requested basis with scheduling by the Client or the client's designated representative. Terracon will not be responsible for scheduling our services and will not be responsible for tests or observations that are not performed due to failure to schedule our services on the project. Since our personnel will not be at the site on a resident basis, it will be imperative that we be advised when work is in progress. Services should be scheduled a minimum of 24 hours in advance. Scheduling personnel will be on an as-available basis which may require changes in personnel assigned to the project. For instances of short-notice requests, personnel may have to be utilized which have a higher rate than those normally assigned, and this higher cost may be passed on to the client.

All requests for services should be submitted to the Angleton, Texas office at the following phone number: (979) 705-7212. Services should not be scheduled through our field personnel.

We recommend the scope of work described in this proposal be provided to the person(s) responsible for scheduling our services, so they are aware of the services that are proposed.

3.1 Compass

Compass is Terracon's latest client interfacing tool and elevates the way we do business. Terracon offers you the ability to view and interact with your testing data in a new way and is committed to using

Proposal for Materials Services

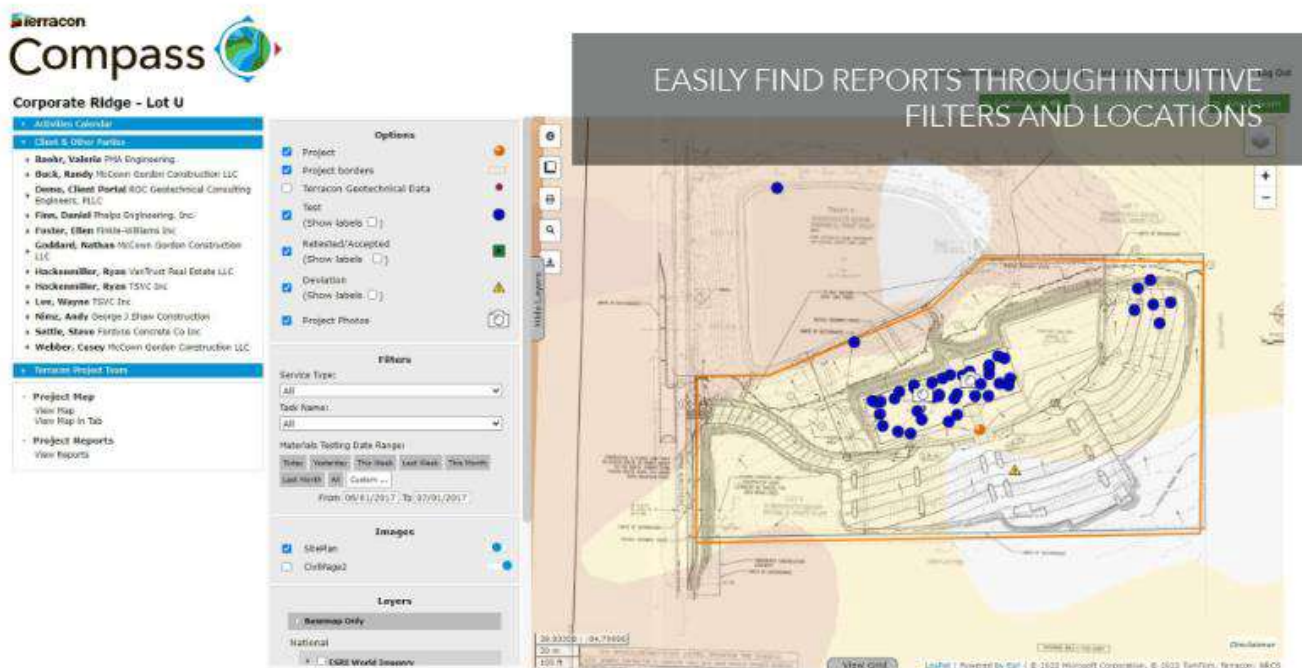

County Road 48 at County Road 1056 Traffic Signal Improvements | Rosharon, Texas

innovative techniques to deliver quality projects. Construction data is viewed by geographic location in relation to your project drawings as part of our seamless project delivery system. Within Terracon Compass, you can access our projects and their associated data, including environmental and geotechnical projects.

When you open a materials project within Compass, you will see your materials tests and observations placed on a map. This geographic reference allows you to find your information by the “where”, rather than the “when.” Other features and advantages of Compass include:

- Filters for Date Performed, Service Type and Test Result Status and intuitive test status designations
- Augmented Testing Reports with In-Place Locations
- Deviation or Non-Conformance Summary: Image overlays to reference multiple plan pages to your test results
- Map layer options: Test results are inserted into Compass as soon as the report has been reviewed and distributed. It becomes easier than ever to view and close deviations with an option to display within a map while also showing them in a table format.
- Quicker turnaround of information and reports

Traditional methods of reporting and accessing results of your project’s inspections, testing, and observations are no longer sufficient for today’s construction projects. With a

large number of reports generated on a single project, you now have a solution to quickly find and view specific data to make timely, informed decisions for your project.

One of Terracon Compass' greatest strengths is that we curate your projects for your future. Terracon Compass shows your team members an interactive map with locations of past and present projects to navigate geographically; or for those that prefer a tabular format, we have that option too. Either way, as you collaborate with Terracon, your team members will be able to build a library of past projects curated online through a secured login. That means a few years after completion, your team can readily find a final, signed deliverable.

3.2 Report Turnaround Time

We understand the importance of report turnaround to our clients, and we are committed to delivering test results on a timely basis as well as the following reporting standards:

- Failing tests or non-conformance items will be communicated to the designated parties prior to leaving the site and handwritten draft reports are available at the end of each day.
- Final reports with non-conformances (Deviation Reports) will be provided within 24 hours of testing. Terracon will maintain a deviation log which will be maintained electronically in our database and can be updated or emailed at any time.
- Final reports without non-conformances will be provided within five business days.
- Final laboratory test reports will be provided within two days of test completion.

4.0 Compensation

Based upon our understanding of the site, the project as summarized in Item 1.0, and our planned Scope of Services outlined in Item 2.0, our estimated fee is shown in the following table:
