

21-32 Summary

Approval to renew with price increase for “ITB #21-32 Road Materials – Surface Courses” to the following vendor, as per the attached.

- American Materials is requesting a 6.76 % increase to all awarded items.

The increases are due in part to increases from aggregate suppliers, rail transportation costs and increases in ancillary operating inputs that are essential to the manufacturing of Hot Mix Asphalts. The Producer Price Index for Rail transportation and labor costs and the increase in construction sand, gravel, and crushed stone supports the increase.
